

# The Philips Lifeline Cordless Phone Communicator DT1000

The Philips Lifeline Cordless Phone Communicator integrates the Lifeline Service into a cordless phone that is designed to help seniors stay connected with Lifeline, family, and friends.

This innovative Communicator gives your program an additional solution to offer seniors and caregivers as they face the challenges of aging, including deteriorating hearing, vision and dexterity. The new Cordless Phone's buttons are easier to dial, its displays are easier to see, conversations are easier to hear, and it even works in a power outage.\*

The Cordless Phone Communicator will help you acquire and retain more subscribers and grow your program. It is a powerful way to differentiate your program by being the first to offer the only medical alert service integrated into a cordless phone.

Now you can offer subscribers what they can't get anywhere else: the peace of mind of the Lifeline Service with the convenience of a cordless phone that is designed around their needs.

- Integrates the #1 medical alert service into an innovative cordless phone
- Large buttons are easy to read and press, making dialing easy
- A large, high-contrast screen displays Caller ID or the number dialed, helping subscribers have the conversations they want to have
- Advanced technology and volume amplification on the handset/speakerphone enable clear, audible conversations
- The lightweight, ergonomically designed handset and base make it easy to pick up, hold, and dock the phone
- Simple to use, with no complicated features
- The Lifeline Cordless Phone even works during a power outage!

## Medical Alert Service

### Fully Integrated Medical Alert Service

The Communicator is seamlessly integrated into the cordless phone.

### Multiple-Subscriber Support

It works with up to eight Personal Help Buttons, allowing you to offer Lifeline Service to other members of the same household.

### Attractive and Discreet

Seniors may more readily accept medical alert service when the Communicator is discreetly integrated into an attractive cordless phone.

## Senior-Friendly Cordless Phone

### Large Displays

Backlit, high-contrast displays are easy to read for dialing and Caller ID.

### Large Buttons

Easy to see and dial, the buttons enable seniors with dexterity and vision challenges to dial correctly.

### Enunciated Dialing

Settings allows numbers to be spoken/announced as they are dialed, which is helpful for the visually impaired.

### Handset Designed for Seniors

Lightweight, ergonomic design makes the handset easy to pick up, hold, and dock especially for subscribers with arthritis.

### DECT 6.0

State-of-the-art digital technology provides the clearest sound and least interference.

## Benefits for Programs

### Minimal Pre-Installation Prep

Rechargeable battery does not need to be charged before installation. Also, by pressing a key combination, the unit will announce learned button codes. The AutoLearn® self-test mode allows installers to easily auto-learn PHBs, test button range, and perform other phone functions.

## Optional Accessories

Up to two accessories can be added.

### Additional Handsets

Easily added anytime, they match the handset included with the base phone and come with their own charging cradle.

### Cordless Voice Extension

This two-way speakerphone has a battery backup and can be used for Help Calls, regular calls, and Remote Call Answer.

### Easy Installation

The Cordless Voice Extension and extra handsets do not require a phone jack, giving you and the subscriber the flexibility to place them throughout the home.

### Easy to Hear

Speakerphone and handset have wider and louder volume range than standard phones. Ringer volume is also adjustable.

### For the Hearing Impaired

Designed to work with hearing aids, it has buttons and displays that flash when there's an incoming call.

### Senior-Friendly Feature Set

We've streamlined features to just the ones seniors prefer and made them simple to use, including Call Waiting, Caller ID, speakerphone, and a button to find a lost handset.

### Remote Call Answer

Subscribers can answer calls on the speakerphone by pressing their Lifeline Help Button.

### Simplified Installations

Activation Voice Prompts provide step-by-step guidance through the installation process. Connections are clearly labeled and color-coded.

### Easy Troubleshooting

If there is a problem, the Reset button will flash. When pressed, the unit will announce and display the issue.

## Safety Features

### Works in Power Outage

The cordless phone works during a power outage. The battery backup provides up to one hour of backup power for regular calls and up to 30 hours for Help Calls.

### Built-in Line Seizure

Even if the handset is left off the hook, subscribers can still place a Help Call.

### Automated Testing and Monitoring

The telephone line and AC power are continuously monitored. The battery is tested daily when operating on AC power and is continuously tested when on battery power. The unit will automatically alert the Lifeline Response Center when the battery back-up is low. Also, the Lifeline Response Center can remotely reset the unit.

## Specifications

Color:	Off-white
Size:	8.75" (22.2 cm) wide 4.5" (11.4 cm) tall 8" (20.3 cm) deep
