

The Philips Medication Dispensing Service

Helps seniors avoid medication mistakes, even when no one is there to help.

Seniors often face serious challenges in managing complex drug regimens – particularly as memory, dexterity, and other skills fade with age. This difficulty presents serious issues for today's elder population, sometimes resulting in more costly medication errors.

The Philips Medication Dispensing Service offers a simple approach to dispensing medication doses at preprogrammed times.

The Medication Dispensing Service can help you better serve seniors in your community. Now you can offer a way to help seniors to remain safely and independently in their own homes by addressing one of the top reasons for the loss of independence – inability to manage medications.

Senior-Friendly Dispensing Features

- It dispenses pre-loaded doses at the scheduled time, with the single press of a button.
- Audible and visual prompts accompany the dispensing of doses.
- 90-minute dosing cycles provide adequate time for seniors to dispense medication.
- Locked cabinet helps prevent inappropriate access and accidental overdosing.
- Easy-to-open dosing cups aid seniors with manual dexterity challenges.
- Audible reminders help seniors remember non-pill medications, such as liquid medications, insulin, etc.
- Audible reminders provide instructions for medication use, such as “take with food.”

PHILIPS
Lifeline

PHILIPS

Service Benefits

- It can help seniors with complex medication regimens avoid errors that might lead to medical complications or unplanned hospitalizations.
- It can reduce anxiety for caregivers when they can't be present to help loved ones with medications.
- It can help seniors remain independent while at home.

Dosing Features

With the largest and most flexible dosing capacity available, it supports even very complex medication regimens:

- Dispenses up to 60 doses
- Accommodates 1 to 40 days of medication
- Dispenses up to 6 times per day
- Has reminder alerts for non-pill medications
- Has reminder alerts for instructions on taking medication

Safety Features

It is designed to minimize the risk of accidental overdosing and related clinical complications.

- Caregiver alerts for missed doses or dispenser refills help promote timely intervention.
- Access to PRN (on-demand) medication is controlled.
- Locked cabinet limits access to medicine, reducing risk of overdosing.
- Rechargeable battery maintains service in the event of power outages.
- Continuous online monitoring reports are available 24/7.

Specifications

Color:	Off-white
Size:	13" x 12" x 14" tall
Weight:	12 lbs
Input Power:	15V DC @ 0.1 A, 12V DC @ 0.85 A
Battery:	Typically operates for up to 12 hours in a power outage, depending upon dosing frequency
Power Consumption:	< 8 Watts
Telephone Information:	Unit is connected to house telephone number <ul style="list-style-type: none">• Ring Equivalence Number (REN): 0.7B• USOC jack required: RJ11C• FCC Registration Number: 6HYUSA-33790-MD-E
Agency Certifications:	FCC part 68, FCC part 15, Canadian equivalents, CE
Safety Rating:	ETL
Compatible Systems:	Emergency Medical Alert communicators Home Monitoring platform
Warranty:	2 years
